

INTRODUCTION TO THE STUDER GROUP FOUNDATIONS

Nine Principles® and Evidence-Based LeadershipSM Framework

FREE VIRTUAL WORKSHOP

The Introduction to the Studer Group Foundations - Nine Principles® and Evidence-Based LeadershipSM Framework is a foundational session designed to provide insights into proven leadership and operational practices and key tools and tactics that drive organisational excellence.

The Nine Principles®

The Nine Principles® outline the nine components of excellence that are consistently present in high-performing organisations. These principles provide a roadmap to help guide employees and teams at all levels of the organisation on their journey to achieving a result based, culture of excellence.

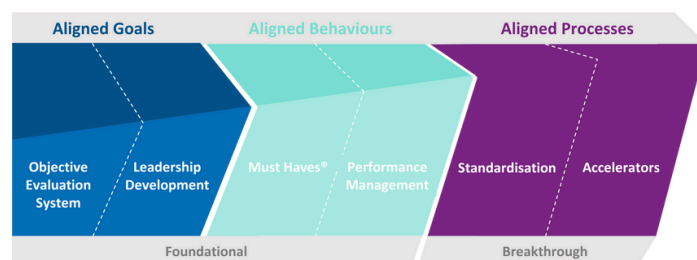

The Evidence-Based LeadershipSM Framework

Evidence-Based LeadershipSM (EBL) is an approach designed to hardwire the behaviours shown through evidence to have the greatest impact on employee engagement, consumer outcomes, and overall organisational performance.

By embedding the EBL Framework, organisations can align their goals, behaviours, and processes. The framework enables the transformation of culture and performance across the whole organisation.

If you are a leader looking to inspire your team, improve performance and culture, and sustain excellence, then this workshop is for you.

This virtual event will be held using the Zoom platform.

The Evidence- Based LeadershipSM Framework
